

# Reported Methyl Bromide Consumption in Other European Countries, 1991 - 1999 (MT) (non-QPS uses)

| Country      | Historical |      |      |      |      |      |      | Future Designated Allowable |      |      |      |      |
|--------------|------------|------|------|------|------|------|------|-----------------------------|------|------|------|------|
|              | Baseline   | 1991 | 1995 | 1996 | 1997 | 1998 | 1999 | 2001                        | 2002 | 2003 | 2005 | 2015 |
| Malta        | 41         | 40   | 62   | 39   | 27   | 36   | 40   |                             | 41   |      | 33   | 0    |
| Switzerland  | 43         | 43   | 24   | 22   | 17   | 20   | 13   | 22                          |      | 13   | 0    | 0    |
| Norway       | 10         | 10   | 9    | 10   | 6    | 6    | 8    | 5                           |      | 3    | 0    | 0    |
| Iceland      | 0          | 0    | 0    | 0    | 0    | 0    | 0    | 0                           |      | 0    | 0    | 0    |
| <b>Total</b> |            | \$93 | \$95 | \$70 | \$50 | \$61 | \$60 |                             |      |      |      | 0    |

Sources: Oberthür 2000, 2001; Ozone Secretariat 2001; UNEP 2000.

Note: Blank spaces indicate no reported data, while a zero (0) indicates either no reported data or 0 MT of methyl bromide consumption.  
Shaded rows indicate Article 5 (Developing) countries.  
Totals may not sum due to independent rounding.

- Malta is an Article 5 (Developing) country while Switzerland and Norway are Non-Article 5 countries as designated by the Montreal Protocol.
- Switzerland and Norway must reach 100 percent reduction of consumption by 2005, while Malta must phase-out by 2015.
